

Brazing/Soldering Solutions for Plumbing and Air Conditioning

A2Z Welding offers gas brazing and soldering solutions specifically to cater for the needs of the heating, ventilation air conditioning (HVAC) and plumbing industries. The products allow the tradesman to carry out high quality brazing/soldering of joints to meet building, construction and industry standards through the use of premium quality gas equipment.

Gas Equipment

- Manufactured by European market leader GCE
- Comply to national and international standards
- High quality, durable construction
- 2 year warranty
- Safe and precise control of gas flow and superior flame quality
- BUTBRO 0-400kPa LPG Pressure Regulator
- BUTBRO Flashback Arrestor
- GCE 6mm LPG hose with rotating adaptor, length to customer requirements
- GCE UNIVERSAL LPG torch with gas saver lever
- GCE Turbo Torch tips for copper tube and pipe Ø12-110mm
- GCE UNIVERSAL B Soldering tips for spot heating, soldering and brazing

Features

- High quality single stage pressure regulator for precise, consistent and safe gas control
- Ergonomic torch handle with pilot flame adjustment and gas saver valve
- Gas saver valve minimises gas consumption, reduces costs
- Gas saver lever improves operator safety, allowing only small pilot flame when not in use
- Rotating adaptor allows torch to swivel, reducing fatigue and increasing flexibility
- Turbo torch tips produce cyclonic flame for excellent adherence of flame to work surfaces and optimum heat control
- High quality flashback arrestor for added safety and security
- Tough and durable outfit box offers safe and convenient storage of components
- Outfits assembled to customer requirements – discounted prices

Standards

Regulator:	SANS / BS EN ISO 2503
Hose:	SANS / BS EN ISO 3821
FBA:	SANS 50730 / ISO 5175 / EN730
